There is a fenced house area where a pad has been cut in a really nice spot with some old fig trees. There is a bore that the drilling company told us was drinking quality water. (We haven't gotten around to equipping the bore as yet) Output of approx. 500 gallons per hour. We were going to put a solar pump on the bore. There are 2 x 3000 gallon poly tanks for the bore to pump into and situated on a hill above where the house was to go to allow gravity feed to the house at good pressure.  
2 dams, 1 only new and an awesome spot that we were going to dam to create a lake to place cabins either side had we kept the block.  
There is a set of steel cattle yards with race, head bale and ramp. Addi...
